

Homework #1

Points: 5

Deadline: 26 September 2021, 23:59

Setup

1. Create a new repository on GitHub and invite your teammates

Tasks

1. Create 2 HTML pages: index.html and login.html
 - Try to match the content of each page to the provided Figures 1 and 2, although it is not required to replicate them 100%.
2. Submitting the login form on login.html should redirect to index.html
3. Use CSS to style the pages (Note: Design and look doesn't have to match provided screenshots), but implementing code using points below is required.
 - Use flexbox to arrange the layout
 - Use an ID selector
 - Use at least 2 different class selectors
 - Use a pseudo-element or pseudo-class
 - Use a Descendant Selector (e.g., div p)
 - Use a Child Selector (e.g., div > p)
 - Use an Adjacent Sibling Selector (e.g., div + p)
 - Use a General Sibling Selector (e.g., div ~ p)
4. Push all your changes to your repository
 - At least one commit from every team member
5. Submit your Name(s), student ID(s), and the repository link to the homework submission page.
